software engineer

mark@mynnx.com

PROFILE Creative and driven software engineer with product management experience.

SKILLS

Javascript	Backbone.js	React/Redux	Mocha/Chai
D3.js	jQuery	Node.js	MySQL
Python	Django	Jenkins	Git

EXPERIENCE **Rackspace Hosting** **Product Manager** 12/2012 - 4/2014

- Integrated Cloud Monitoring metric graphs into the Rackspace Cloud Control Panel, reducing support resolution times by 30%
- Performed customer research for the Cloud Intelligence product
- Collaborated with a team of 5 engineers, UX, Support, Marketing, and stakeholders
- Built mockups of interface and performed usability tests with customers
- Established and documented best practices for other PMs at Rackspace SF
- Mentored other PMs through the process of product discovery experiments

Rackspace Hosting **Software Engineer** 8/2009 - 11/2012

- Worked with the Cloudkick team to transform their product into the Rackspace Cloud Control Panel, written in Django and Google Closure
 - Implemented Twisted services that use Thrift and RabbitMQ for coordination
 - Set up a Jenkins CI instance and wrote code to support continuous testing/deployment
 - Modified Chef recipes and deployment code to support new features
 - Built provisioning APIs for the Email and Apps division of Rackspace in Python and Perl
 - Wrote MapReduce jobs to obtain and report SMTP statistics
-
